CBA has become the first relative to univel years that are completely Gode to Code Cetified at the Gold level. Designed in partnership with Fishkon for Good, a global platform that arm to make all failing good, the years have been mode with completely sustainable materials and produced in compliance with the high Giadle to Cradie Cetified Gold level.

THE CIRCULAR ECONOMY

- BREXIT and supply chains for materials
- E-commerce websites
- GPS tracking
- Online shopping
- Online food shopping
- 3D printing at home
- Paperless transactions
- Electronic waste recovery
- Leasing from cars to clothes
- Robotics and AI
- Battery power storage

THE CIRCULAR ECONOMY

- Closed loop systems where waste from one process becomes the input to another process
- Focus on quality
- Faster adoption of new technologies
- Redesign of components, materials and products
- Redesign of business processes
- Sustainable use of resources

CIRCULAR ECONOMY

The Circular Economy Club (CEC) is the international network of over 2,600 circular economy professionals and organisations from over 60 countries.

Non-profit | Global Anyone can join online for free

WHY ESTABLISH A CIRCULAR ECONOMY CLUB?

Bring the local business community together to solve local challenges when implementing the circular economy.

WHY ESTABLISH A CIRCULAR ECONOMY CLUB?

- Build on the enthusiasm, drive and expertise that's already here.
- Develop a forum to share and develop expertise and knowledge in the sustainable use of resources.
- Develop and deliver resource management projects that reduce what we throw away, retain value and create employment.
- Accelerate circular economy activities across the Liverpool City Region.
- Share experiences and expertise
- Learn from an international network of more than 2,600 circular economy professionals and organisations across 60 countries.

The Circular Economy Club Liverpool City Region BECOME A MEMBER

WHAT'S IN IT FOR ME?

- Hear from practitioners who have already changed the way they do things
- Check if your organisation is using resources in the most efficient way
- Use circular economy thinking to:
 - Save money
 - Create jobs
 - Reduce impact on the environment
 - Create social value
 - Improve unique selling proposition (USP)

EIRCULAR ECONOMY

IVERPOOL CITY REGION

WHAT'S IN IT FOR ME?

- Get access to best practice and toolkits to help you improve performance
- Get ideas to set your business apart from the crowd
- Increase your business contacts
- See the circular economy in action on the ground in the Liverpool City Region
- Tell your story and promote better business

A few words about poverty

- 14 million people live in poverty in the UK
- Over 1 in 5 of the population.
- 8 million working-age adults, 4 million children and 1.9 million pensioners.
- 8 million live in families where at least one person is in work.

A Housing benefit has failed to keep pace with rising private rents, according to the Chartered Institute of Housing. Photograph: Yui Mok/PA

Collect, reuse and recycle over 250,000 items annually in Liverpool alone

Triple bottom line

- Financial Savings for customers v traditional disposal routes
- Prohibitive cost of doing the 'right thing' v traditional disposal routes
- Income for recycler
- Environmental benefits of reuse and recycling v disposal
- Security of raw materials

BENEFITS

- For families getting furniture this includes health, esteem, optimism,
- For society this includes current savings in welfare budget, revenues when people move from benefit to earnings, future savings against 'slippery slope' outcomes that are a lot more costly to address

Cheap Intensive COST COST COST Landfill Trash Waste Scale Rubbish Outdated

Industrial waste - polystyrene recycling

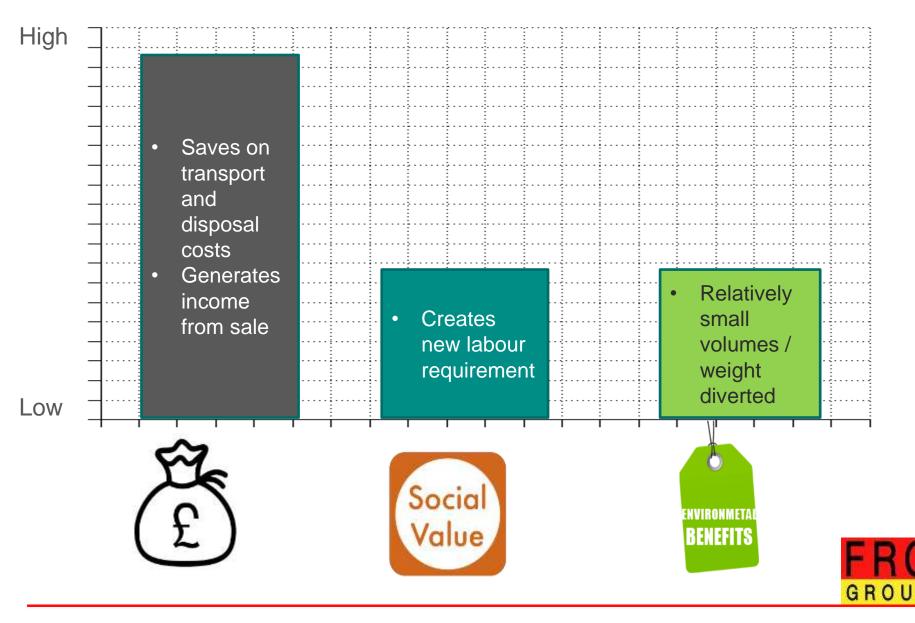

Jordan, Senior Vice President of Polystyrene Recycling!

ME

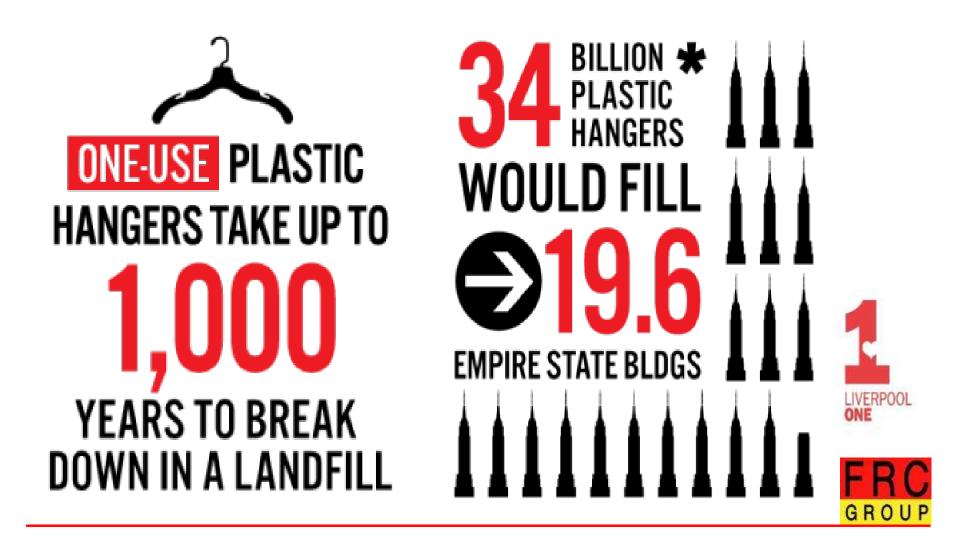

Triple bottom line - polystyrene recycling

Retail waste – Plastic hanger reuse and recycling

"Having the furniture and everything has improved my quality of life. If you don't have anywhere to sit you feel awful. We can eat at the table. We can sit on the couch and not on the floor."

"My sons can put their clothes in a wardrobe and not in a suitcase."

"Everything is neat and tidy. Before we did not have a fridge or microwave. Now we don't have to have junk food we can eat healthily."

Liverpool, England, 2018

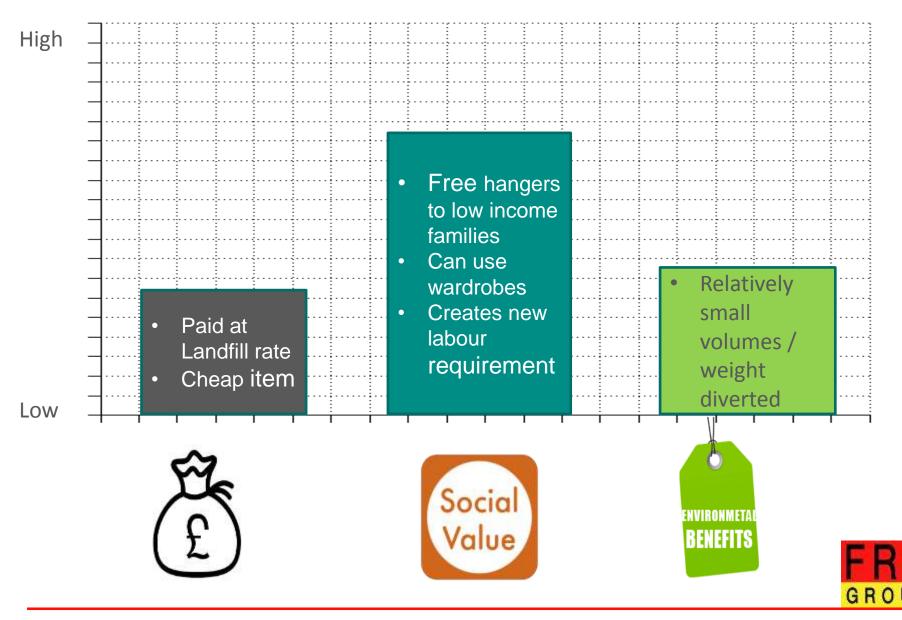

.... OR £2'S FOOD?

Triple bottom line - hanger reuse/recycling

Municipal Waste – Mattress reuse and recycling

Mattress Facts

- 60k p.a managed by MRWA
- 10k p.a. collected by bed companies delivering new beds in Merseyside
- 30k student beds in Liverpool
- 6.5k hotel bed spaces in Liverpool
- Nationally, 5,900,000 disposed in 2014
- 16% (944k) recycled
 11% (649k) incinerated for energy
 73% (4.3M) Landfilled

Very few reused

Why do people get rid of mattresses?

Mainly because of circumstances:

- Downsizing
- Moving from single to double
- Moving from bunk beds
- Developed need for orthopaedic
- 'Fancy a change' decorating
- Death & divorce
- Belief that it is 'too old'

Sometimes because of the mattress:

- Broken
- Ripped
- 'Accidents'

Benefits

- All horrible mattresses stripped down to component parts and recycled to avoid landfill
- Jobs and salaried training opportunities created
- Environmental benefits

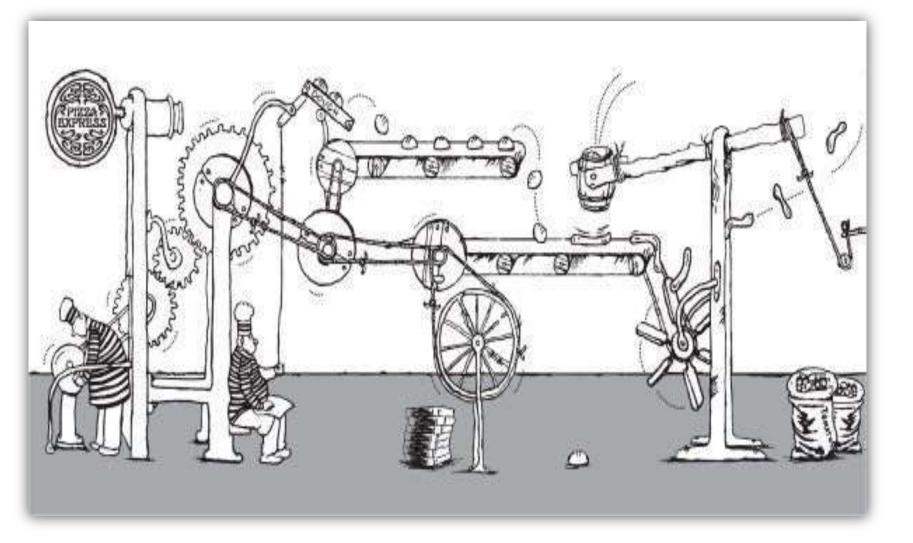

Six Step ultraclean process comprising:

- Inspection and quality check
- Stain treatment
- Infra Red Heat
- Intensive UV Light
 Treatment
- Overheated Dry Steam
- Industrial grade vacuuming
- Deodorising
- All dust mites, bed bugs and bacteria killed and removed along with dead skin and hair

Together for Manufacturing.

	Thinking / Rhetoric	Structures / Contracts / Payments	Outcome
Reusing / Recycling Industrial waste			
Reusing / Recycling Retail waste	\checkmark		
Reusing / Recycling Municipal		\succ	FRC GROUP

CONCLUSIONS

- Rhetoric is at times ahead of the reality no bad thing
- Success of circular economy sometimes requires structural change at a system level – not just a change in thinking. Especially relevant to large scale, long duration, municipal contracts.
- Who pays for the wider social / environmental value created by the circular economy?
- We need people to make the change from cost to benefit thinking and action
- What role can people in this room play?

LWARB's programmes

Resource London: Partnership with WRAP - Supporting London's local authorities

- Minimising the amount of waste produced and maximising re-use
- Increasing and improving the capture of unavoidable food waste
- Improving the yield and quality of dry recycling
- Restricting residual waste

Advance London: Investment and business support

- Portfolio management
- New investment activity
- Collaboration
- Business support

Circular London: Driving the circular economy agenda in London

- Communication
- Collaboration
- Demonstration

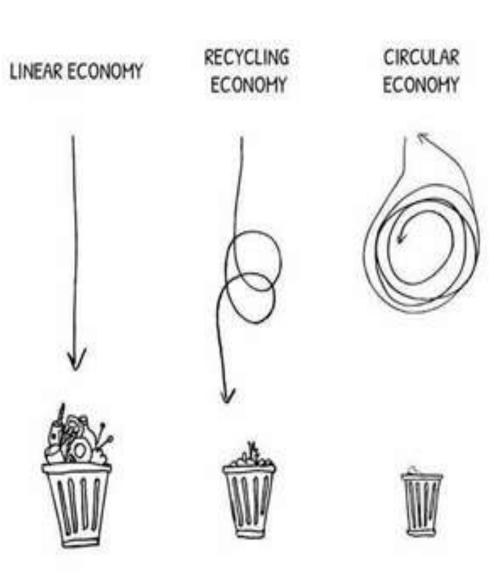

'a circular economy keeps products and materials circulating within the economy at their highest value for as long as possible, through re-use, recycling, remanufacturing, delivering products as services and sharing'

A circular economy and your role as the consumer: the talking thread Products as services Self access to products while retaining ownership of assets or dematerialisation

Sharing economy Share assets (for example cars, rooms, appliances) via sharing platforms.

> Prolong product life Through maintenance, designing for durability, re-use and remanufacture of products and components,

Recover value at end of life Through effective recycling and composting/AD.

Renewable inputs Shift to using secondary materials as the inputs for products.

London

- London is growing fast population is predicted to reach 11m by 2050 which means our attitude to waste needs to change
- The circular economy provides a sustainable and profitable solution to the challenges of this dramatic growth
- By 2041 could reduce waste by 60%
- By 2036, the circular economy could provide London with net benefits of at least £7bn every year and 40,000 new jobs (12,000 net additional jobs) in the capital by 2030
- Embedding circular economy in Mayoral strategies

London's circular economy route map outlines 100 practical actions to transition London to a circular economy whilst providing jobs, growth and impact.

FOCUS AREAS:

- built environment
- food
- textiles
- electricals
- plastics

- Technical assistance to the GLA in the development of the draft London Plan, including the circular economy statement.
- Working with Clarion to embed circular economy principles into a new development.
- Running a pathfinder project funded by Climate KIC to work with built environment clients to specify more circular outcomes.
- Signed up to be a supporter of UKGBC's circular economy programme.

Built environment

The circular economy opportunities in the built environment will add £3-5bn to GDP by 2036.

- innovations like modular construction.
- more effective utilisation of buildings.
- design for building disassembly, material management and re-use.

- TRiFOCAL London-wide behaviour change initiative could save Londoners £330m, reduce avoidable food waste in the capital and increase awareness of more healthy and sustainable eating, led by Resource London (EU Life)
- Resource London are supporting local authorities to introduce food waste collections and increase volume of collections where they already exist
- The Circular London team developed circular food waste scenario's for the Old Oak Park Royal area of London together with ARUP and the GLA

The circular economy opportunities in the food sector will add £2-4bn to GDP by 2036.

- raising consumer awareness and knowledge.
- reducing avoidable food waste.
- using unavoidable food waste to create energy/compost.

- LWARB and QSA Partners are working with international online retailer ASOS to pilot a new circular business model (ECAP, EU Life).
- Been successful in gaining funding from C&A Foundation to take a similar approach with four further retailers.
- Running the 'Love not landfill' campaign a behaviour change campaign targeted at London's 16-24 year olds (ECAP, EU Life).
- Circular economy expert in residence at London College of Fashion, UAL.

The circular economy opportunities in the textiles sector are over £1bn by 2036.

- increasing the lifetime of clothes through design and innovative technologies.
- increasing the usage of clothes through renting or leasing.
- increasing the re-use, repair and recycling of clothes via incentivised return schemes.

- Promoting circular for all office items including IT, together with Business in the Community.
- Resource London supported 10 Restart electricals repairs parties in 2017.
- Advance London are supporting Tryatec and Stuffstr, both companies whose business models help to reduce our consumption of electrical equipment.

Electricals

The circular economy opportunities in the electrical and electronic equipment sector will be at least £900m by 2036.

- sharing, renting and product as service business models.
- increased re-use/effective recycling rate.
- designing better products that enable longer product life.

- The Mayor is supporting the reduction of the use of single use plastics in the city – water fountains and refill London
- LWARB is one of the founder members of the Ellen MacArthur Foundation's New Plastics Economy initiative
- Responding to UK Government consultations on single use plastics

Plastics

The circular economy opportunities in the plastics sector will be at least £200m by 2036.

- activities to reduce plastic use.
- increasing the recycling rate.
- innovative recycling technologies.
