

WORKING IN PARTNERSHIP

Glass Recycling: A Cutting Edge Partnership

At our glass recycling plant in St Helens, Veolia is working with Knauf Insulation, the UK's leading provider of high performance, sustainable insulation solutions, on a partnership with a difference.

By providing a stable supply of high-quality recycled glass, we help Knauf Insulation secure its glass supply and maintain the recycled materials content (up to 80%) in the manufacture of its Glass Mineral Wool insulation solutions. What's more, we reduce landfill burden and, because we all know that insulation makes our homes and offices more energy efficient, we also help substantially reduce carbon emissions. If that wasn't enough, our £10 million investment in the region has also created 18 permanent jobs.

12,000 tonnes
CO₂ equivalent avoided

that's the same as removing **7,000 cars from the road each year**

76,000 MWh
energy saved

that's enough to make **20 million wine bottles from scratch**

5,000 tonnes

of glass can be processed every month at our glass recycling plant
