

APRIL 2020 – MARCH 2023

Appendix 7 COSHH Assessment

COSHH assessments for the following items used in the day to day maintenance are included as a separate document:

Product	Description	Use
WD40	Lubricant	On-going borehole maintenance, to keep bolts and other fitting lubricated. Also use to assist in freeing seized bolts.
Ant Powder	Insecticide	As required to prevent insect nests around apparatus and installations
Harpic	Cleaning agent	Remove biofilm from sparge pipe jetting nozzles in aeration tanks at Billinge HQ, Foul Lane, and Sefton Meadows II
Copaslip	Copper grease	Lubricant to protect against seizure, rust, oxidation and other corrosion.
Citric Acid Anhydrous	E330 Citric acid food additive in powder form	Leachate system cleansing, used to clean sparge tanks and pipelines of biofilm and sediment build up.
